github.com/LiyanKhanduqji

Frontend developer with experience building dynamic, responsive web applications using **Vue.js**. Skilled in front-end and expanding my qualifications in this field, with a strong focus on delivering scalable and efficient solutions.

## WORK EXPERIENCE

### Frontend Developer Evokey

02/2024 - 03/2025

Amman- Jordan

#### Achievements/Tasks

- Built numerous bilingual websites using Vue.js, incorporating technologies like routing, Pinia, form validation, API calls, TypeScript, Sass, and Tailwind CSS.
- Worked closely with design, quality assurance, and backend teams to ensure high-quality project outcomes.
- Developed secure login systems with role-based authentication, enhancing user access control and data security.
- Developed strong expertise in handling APIs using Postman, ensuring seamless integration with backend services.
- Managed project versions using GitLab, ensuring efficient and organized development processes.
- Implemented efficient filtering, sorting and pagination features to optimize data display and user experience in web applications.
- Attended client meetings to gather requirements and prepared SRS documents to outline project specifications.

### Frontend Developer Chain Reaction

10/2023 - 02/2024

Amman- Jordan

#### Achievements/Tasks

- Developed responsive web pages using Vanilla JavaScript, Tailwind CSS, and Sass.
- Revamped projects by cleaning code, optimizing SEO and replacing outdated technologies.
- Learned and applied Vue.js in practical projects, enhancing frontend development skills.
- Collaborated with quality and design teams to ensure project alignment and user experience.

## SKILLS

## COURSES

### Dive in and learn React.js from scratch! Learn React, Hooks, Redux, React Router, Next.js - Udemy

*Covered fundamental and advanced React concepts including Core React principles: Components, props, state, and event handling. React Hooks (built-in & custom) and state management. Working with lists, conditional content, and user interactions. Styling with Styled Components & CSS Modules. Debugging and performance optimization. Side effects, Fragments, Portals, and class-based components. HTTP requests and handling responses. Form handling, validation, and React Form Actions. Routing with React Router*

## GRADUATION PROJECT

### Mental Health Care (03/2023 - 07/2023)

- I contributed to the development of the "Mental Health Care" website for Jordan University students, focusing on front-end development and content creation. I utilized modern web technologies to create an intuitive, user-friendly interface and implemented a booking system for mental health consultations, significantly enhancing the platform's accessibility and functionality.
